INTEGRATED BUILDING SCIENCE

ENERGY STAR® v3.0 Course

Our students recognize our expertise, experience and excellence of instruction...here's what they have to say!

"Brett is a great instructor. Has vast experience in what he's teaching, not reciting a book. He's honest and freely gives of what he knows. He's inspirational."- Scott M.

"Quality of instruction remains high. Emphasis on increased Quality Assurance and market place changes complements the technical aspects of v 2.5 and v 3.0 training."- Chris F.

"I think the instructor knows his subject matter extremely well, and is able to pass along his know-how in an interesting manner."- Donna E.

This course is approved by RESNET and the EPA for Raters to earn 18 hours of professional development. All Raters and Field Inspectors who intend to work on ENERGY STAR certified homes in 2012 must attend a course covering the new program. Don't waste time and money- learn from the best so you can help your clients achieve their goals.
